

Selectable text: edge cases

Try selecting, searching (Cmd/Ctrl+F), and copying the text on this page.

Scripts

Latin, accents, CJK, Korean, and emoji all copy back exactly.

Invoice #1042 (paid) – total \ fees
Résumé, naïve café, déjà vu, Ærøskøbing
日本語のテキスト・中文文本・한국어 텍스트
Emoji stay one character each: 🇸🇪✅📄

Wrapped paragraph

Soft-wrapped lines are separate lines in the PDF, in reading order.

The quick brown fox jumps over the lazy dog
while the invoice total is calculated, the receipt is
printed, and the PDF is shared.

Indented with spaces

Leading spaces aren't part of the text; selection starts at the word.

Subtotal (indented with spaces)

Right-aligned and centered, no wrapping

The text layer sits over the drawn text, not at the left edge.

— Thank you for your business —

Total due: \$1,284.50

Padding after a semantics modifier

Modifier.testTag(...).padding(24.dp): the text layer follows the drawn text inside the padding.

Tagged and padded text

Clipped and ellipsized text

Only what's visible is in the text layer: the hidden word isn't searchable.

Visible line

This sentence is cut off with an ellip...
